

# QUOTIENT.FI

THE DeFi MARKETPLACE ENABLING LIQUIDITY & LEVERAGE FOR YOUR ASSETS THROUGH BESPOKE STRUCTURED PRODUCTS

## DeFi PROBLEM

Existing DeFi structured products are not designed to support all types of digital assets or positions. They also do not cater to individual risk preferences. Users have very limited bargaining power and often bear additional token layer friction and risk.

Under Utilization of Assets

Collective & Pool based risk

Lack of gaurdrails for Investors

Avenues for Treasury Diversification

TradFi structured product markets are plagued by a different set of inefficiencies that highlight collusion, high cost of doing business, rent-seeking and are not transparent when compared to permissionless systems.

## TradFi

## SOLUTION

**QUOTIENT.FI** An open-for-all decentralized capital market that unlocks liquidity and leverage for any asset or position; enabling anyone to create or invest in DeFi Structured Products as fractionalized NFTs, with decentralized solutions for credit risk rating of assets and user credit scores.

## BENEFITS

### BORROWERS

- Borrow against any crypto asset or position across chains
- Bespoke LTV ratio, interest rate, and maturity
- Direct sales, auction, or whitelist investors
- No auto liquidation
- Earn incentives on payback

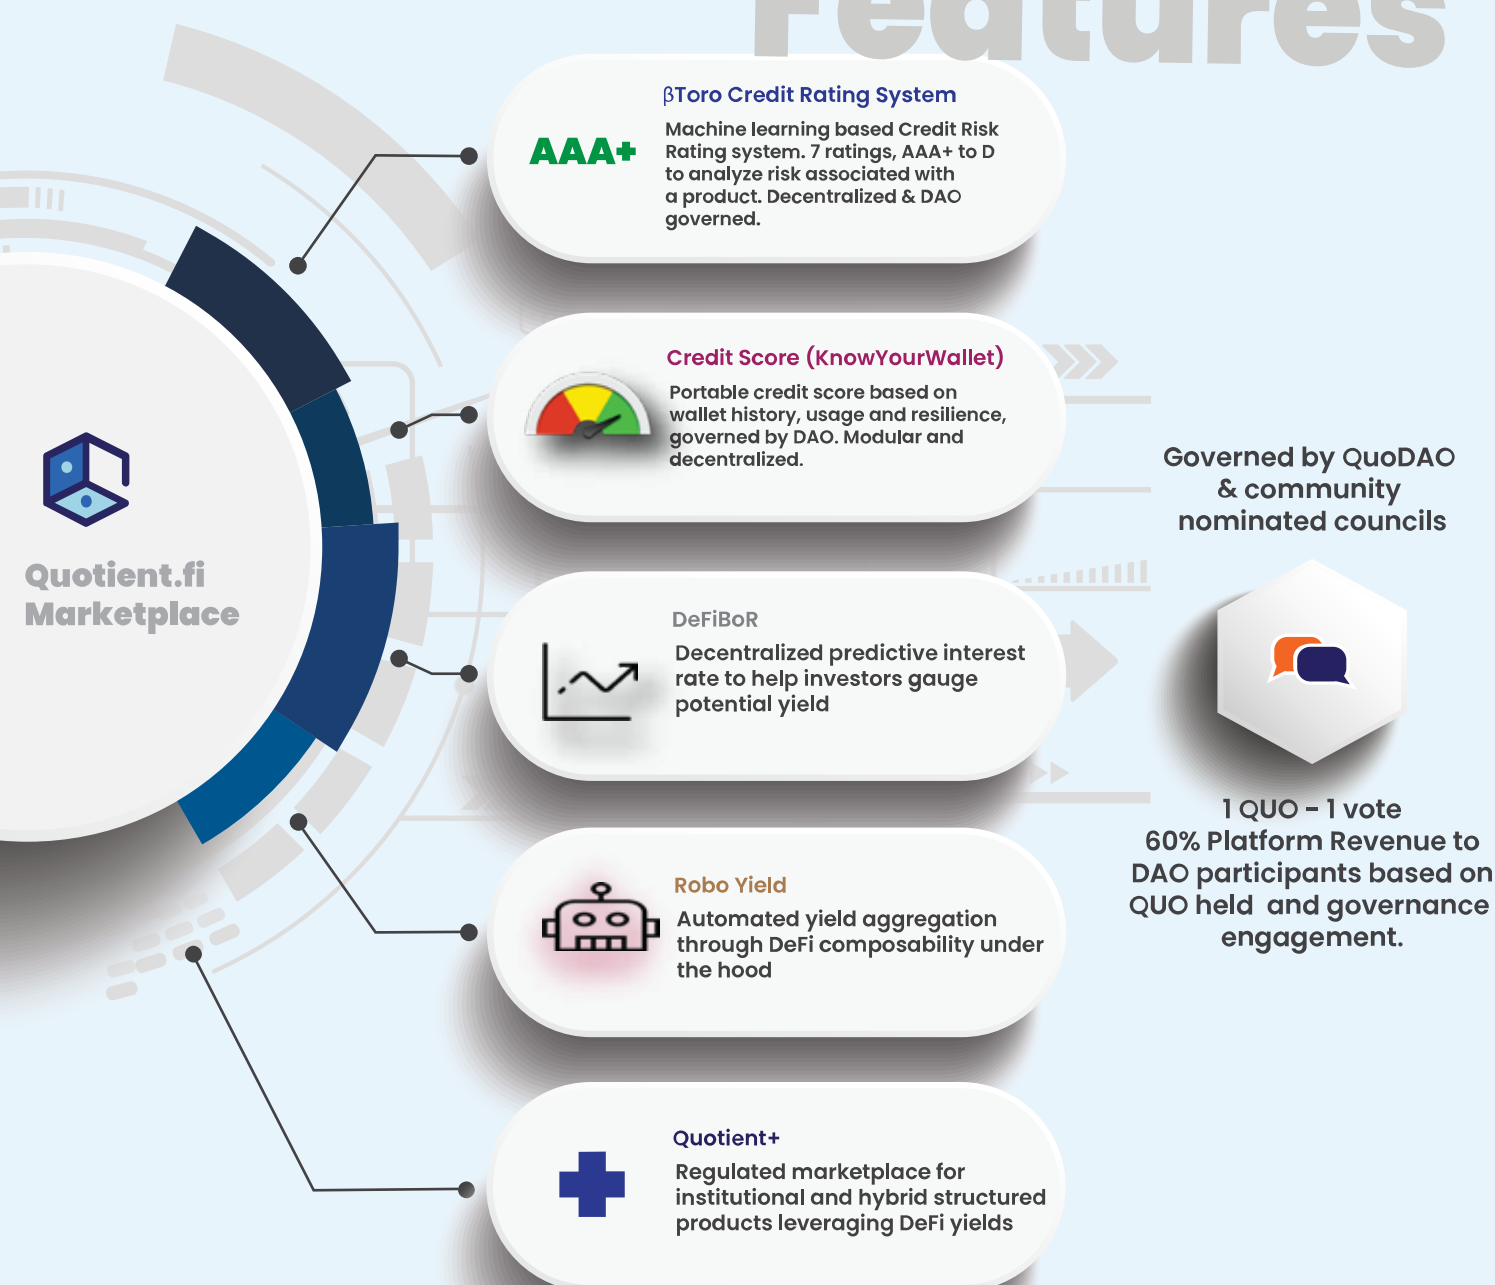

### LENDERS

- Ability to evaluate credit risk rating, borrower credit score, and potential yield
- Defined terms or negotiate terms
- Exposure at fractional cost to multiple assets
- Earn streamed incentives for the term of participation.
- No performance fee

### DAOs, PROJECTS, FUNDS

- Access liquidity without monetizing equity
- Diversify treasury through term investments
- Create & trade cash flow based or equity structures
- Limit access and exposure by whitelisting investors
- No intermediary token friction or risk
